Complete Solutions for Industrial Valves

NEWAY, being the largest valve manufacturer in China, has fulfilled all the qualifications to manufacture a wide range of industrial valves for the most severe and demanding services of the Oil, Gas, Refinery, Chemical, Marine, Power and Pipeline Industries.

NEWAY's products include: Gate, Globe, Check, Butterfly and Ball Valves. Size range from 1/2 " ~64 "; class rating from 150lb~2500lb; materials range from conventional cast or forged steel to special alloy material like Monel, Inconel, Hastelloy or Duplex steel. Neway is able to produce valves for working temperature -196 ~ 650 , all available to fully comply with ASTM, ANSI, API, BS and DIN standards.

NEWAY Facilities

NEWAY's facilities include 3 Valve Factories. 2 Foundries and 1 Technical Research Center. NEWAY employes a large number of CNC machines for most of valves fabrication and we are among the few manufacturers who are able to perform inhouse Fire Safe test, Cryogenic test, High Pressure Gas test, High Temperature test and Low Fugitive Emission Test.

Quality Assurance

NEWAY's Quality Assurance is dedicated to the pursuit of a zero defect valve, and this has resulted in the company having more quality qualifications than most of our competitors. NEWAY is certified to ISO 9001, API 6D, CE/PED and NEWAY's Marine Valves are type approved by ABS. NEWAY full series of gate, globe and check valves low fugitive emission test was type approved per TA Luft and NEWAY soft seated ball & butterfly valves were fire safe tested & certified by Lloyd's Register

Quality Commitment

eway recognizes the importance of valve quality for the safety and protection of personnel health and property. It is our quality commitment to focus our resources to provide our customer's with first class products at a competitive price, that are designed, manufactured, inspected and tested in accordance with our customer's specifications and that comply with all international standards.

With respect to the facts that the current industrial standards do not always take into consideration the likelihood and consequences of possible deterioration in service, related to specific service fluids or the external environment in which they operate. Our customers are requested to keep an open line of communication with our engineering department to identify and implement standards, that will provide valves with the possibility of deterioration in service, so as to ensure safety over the valves expected lifetime.

Fire Safe Test

Products Views

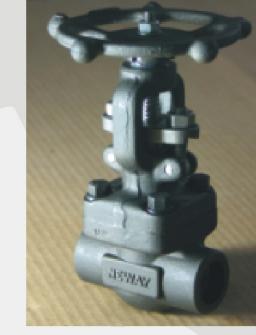

Neway compact forged steel valve series consist of gate, globe and check valves. It is optimize designed by means of advanced FEA (Finite Element Analysis) in accordance with API 602, EN ISO 15761, and ANSI B16.34. This series are available in size from NPS 1/2" to 2", and pressure classes include ANSI classes 800#,1500# and 2500#. A wide range of body materials are also available including A105, LF2, F11/F22, F5/F9, F304, F316/Letc.

Bolted bonnet is a standard design of the series valve, threaded-and seal-welded bonnet or pressure-seal bonnet is optional. Full range of integral flanged ends gate, globe and check valves were also developed. Special feature like NACE MR0175 requirement for sour service can be available upon request.

Neway compact forged steel valve main components are all CNC machined so as to ensure continual constant high machining quality, and then assemblied, tested, and packaged on two new integrated assembly lines in Neway's corporate headquarters plant. The daily production capacity of these two lines is in excess of 1000 units.

How to Order

Figure Number Example:

Neway valve figure numbers are designed to cover essential features. When ordering ,please show figure numbers to avoid misunderstanding of your requirements. However a detailed description must accompany any special orders.

Forged Steel Globe Valve

Dimensions

Bolted Bonnet & Integral Flanged Ends

Forged Steel Check Valve

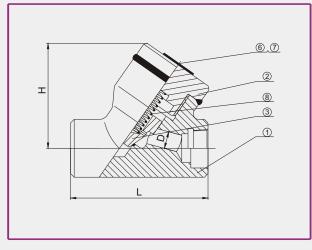

Design Features

- Leak proof body-bonnet Joint Caving to eliminating the unwinding of the SS spiral metal.
- Body guided disc to assure perfect alignment of disc and seat even at large flow velocities.
- 3 Swing Disc is Optional, While T-Pattern Piston Valve is available upon request.

Bolted Cover

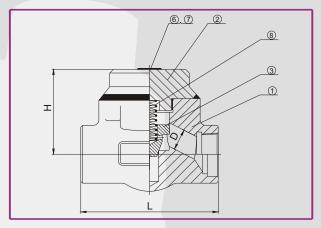

Y Pattern Welded cover

Forged Steel Check Valve

G.A. Drawing & Dimensions of Swing Check Valve

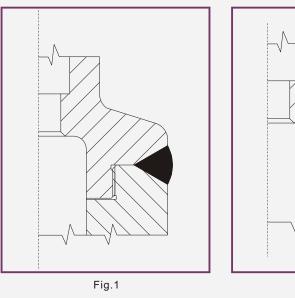

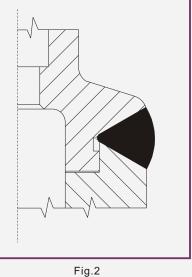

Bolted Cover

Optional Design Feature

Welded Bonnet

The standard type of Neway welded bonnet valves is threaded-in and seat-welded bonnet (see Fig.1), or optional full penetration welding. (see Fig. 2)

Gland Bolt

For Neway forged steel gate and globe valve, the gland bolts are supplied in the standard type of hinged eyebolts (see Fig.3) or optional studs design (see Fig.4). Hexagon nuts are used for both cases.

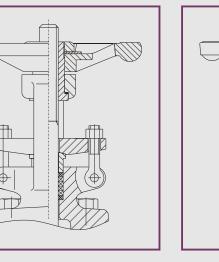

Fig.3

Fig.4

Bolted Bonnet

For ANSI Class 1500 & 2500, RTJ bonnet joints is the standard design (see Fig.5), but for ANSI Class 1500 can also be supplied with optional male to female bonnet joints design. (see Fig.6)

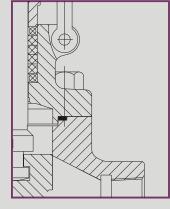

Fig.6

Seller will replace without charge or refund the purchase price of products provided by Seller which prove to be defective in material or workmanship, provided in each case that the product is properly installed and is used in the service for which Seller recommends it and that written claim, specifying the alleged defect, is presented to the Seller within 18 months from the date of shipment or 12 months after installation, whichever occurs first. Seller shall in no event bear any labor, equipment, engineering or other costs incurred in connection with repair of replacement. The warranty stated in this paragraph is in lieu of all other warranties, either expressed or implied. With respect to warranties, this paragraph states Buyer's exclusive remedy and seller's exclusive liability.
